

CDE PROGRAMME ON MAGNETIC MALLET-CHANGING RULES OF IMPLANT DENTISTRY BY USING MAGNETIC DYNAMIC TECHNOLOGY

16-05-2023

Department of Oral and Maxillofacial surgery, SRCDSR in association with Osseotouch Total Control organized a Continuing Dental Education (CDE) programme on magnetic mallet-changing rules of implant dentistry by using magnetic dynamic technology on 16th May, 2023. The guest speakers of the day were Mr. Claudio De Giglio, CEO and Founder of Osseotouch Total Control and Dr. Athreya Rajgopal, a renowned Oral and Maxillofacial surgeon. The event was inaugurated by Dr. C.M Marya, Principal; Dr. Vishal Juneja, CEO; Dr. Ashish Gupta, Head of the Department, Oral and Maxillofacial Surgery; Head of the Departments and senior faculty members of various departments. The guest speakers threw light on the new technology in the field of oral implantology, i.e. the use of magnetic mallets which is said to preserve more bone and provide better working standards. . The event was attended by all faculty members, post graduate and undergraduate students, interns of the institution. The programme was a very informative, live interactive session which helped the dental professionals and students to update themselves about the latest advancement and clinical application of magnetic mallet technology in implant dentistry. After the conclusion of the programme, the guest speakers were honored and felicitated by the Principal, Dr. C.M Marya. Overall, the event was a resounding success with all the participants having updated their theoretical knowledge and clinical skills.
